Buenos Aires, Argentina. Phone: +54 9 11 3667-8351

Summary

Frontend Developer and Universidad Tecnológica Nacional graduate with experience building IoT interfaces in productive environments. Currently working at an international company developing solutions for industrial clients (ENI, P&G, IAC, AES), focused on real-time data visualization, UX/UI, accessibility, and production stability.

Professional Experience

- **Frontend Developer | IoT & Dashboard Solutions — Sensary LLC.**

Florida, United States · Remote · Full-time · November 2025 - Present

- Development of operative IoT dashboards used in production by international industrial clients (ENI, P&G, IAC, AES).
- Design and implementation of interactive and accessible interfaces for real-time data visualization from industrial sensors.
- Creation and customization of reusable widgets and components focused on UX/UI, responsive design, performance, and maintainability.
- Work with critical data (alarms, energy, H2S gases, real-time people and vehicle tracking, gateways, industrial machinery, airport doors, battery levels).
- Integration and configuration of IoT devices on platforms such as ThingsBoard and ThingPark.
- Daily collaboration with frontend, backend, and product teams in a remote environment.
- Participation in high-pressure deliveries and last-minute adjustments prior to client demos.
- Technical documentation in Confluence and communication in English (written and verbal).

Stack: JavaScript, TypeScript, Angular, HTML, CSS, ThingsBoard, HERE, Git, Figma, Jira, Confluence.

- **Relevant projects**

- **Prodeazo** (2026). Web app for making predictions for the 2026 World Cup. [Website](#)
 - **Vital Avellaneda** (2025). Platform simulating an Online Medical Clinic. [Website](#)
 - **Messi Perfect Shots** (2024 - 2025). Bot for the Twitter/X social network. [Website](#)
-

Technical Skills

- **Technologies & Tools:** HTML, CSS, JavaScript, TypeScript, Angular, Next.js, Tailwind CSS, Bootstrap, Astro, SQL, Firebase, Node.js, PHP, .NET (C#), Git, Ionic, Postman, ThingsBoard, Figma.
 - **Soft Skills:** Communication, collaboration, problem-solving, flexibility, continuous learning, critical thinking, proactivity, creativity, attention to detail and dedication.
 - **Languages:** Spanish (Native) and English (Intermediate).
-

Education

Programming Technician Degree

2021 - 2024

Universidad Tecnológica Nacional (Avellaneda)

- Participated in complex projects, developing collaborative skills through teamwork and simulated professional environments.
- Studied client-side web development (Angular, TypeScript, Bootstrap) and server-side (PHP, SQL, Firebase, Node.js, .NET), among other programming paradigms.
